

## Add – Subtract – Multiply – Divide Calculator

Change layout from RelativeLayout to LinearLayout(simply edit RelativeLayout) in this example

### Activity\_Main.xml

```
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:orientation="vertical"
    android:layout_marginTop="20dp"
    android:layout_marginLeft="20dp"
    android:layout_marginRight="20dp" >

    <TextView
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:text="@string/tvNum1"
        android:id="@+id/tvNum1"
        android:textSize="20sp"/>

    <EditText
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:id="@+id/etNum1"
        android:inputType="number" />

    <EditText
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:id="@+id/etNum2"
        android:inputType="number" />
```

```
    android:layout_height="wrap_content"
    android:id="@+id/etNum1" />

<TextView
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:text="@string/tvNum2"
    android:id="@+id/tvNum2"
    android:textSize="20sp" />

<EditText
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:id="@+id/etNum2"
    android:hint="@string/etNum2"/>

<Button
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:text="@string/buttonAdd"
    android:id="@+id/buttonAdd" />

<Button
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:text="@string/buttonSub"
    android:id="@+id/buttonSub" />

<Button
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:text="@string/buttonMul"
    android:id="@+id/buttonMul" />

<Button
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:text="@string/buttonDiv"
    android:id="@+id/buttonDiv" />

<TextView
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:text="Answer"
    android:id="@+id/tvAnswer"
    android:textSize="20sp"
    android:padding="10dp"
    android:background="#4314b2ff"/>
</LinearLayout>
```

### MainActivity.java

```
package com.raymundoconnor.addsubtmultdivcalculator;
```

```
import android.support.v7.app.ActionBarActivity;
import android.os.Bundle;
import android.view.Menu;
import android.view.MenuItem;
import android.view.View;
import android.widget.Button;
import android.widget.EditText;
import android.widget.TextView;

public class MainActivity extends ActionBarActivity implements View.OnClickListener {

    private Button buttonAdd,buttonSub,buttonMul,buttonDiv;
    private TextView tvAnswer;
    private EditText etNum1,etNum2;

    @Override

    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        init();
    }

    private void init() {
        buttonAdd = (Button)findViewById(R.id.buttonAdd);
        buttonSub = (Button)findViewById(R.id.buttonSub);
