LeeWeb Exercise

**Brief**

Based on everything you have learned since the beginning of the course, you are required to design a UI for the following

- A web design company named "LeeWeb" based in Cork City
- The app must promote their web development business
- The app must also allow users register for an eNewsletter
- Text below, relevant images and the logo below must be included in the design
- You may include other widgets to enhance the apps UI and functionality

Text

"LeeWeb offer an extensive range of digital design services to meet all your requirements.

Our team of experts will simplify the process for you, making it a jargon free experience and ensuring you create the best face for your business online.

Website design is about much more than creating a design that is fresh and appealing. Any website that is to become a successful sales and marketing tool needs to be intuitive, easy to use as well and responsive in design to work with the explosion in mobile devices accessing your content on the go.

We also now offer branding, logo design and corporate identity as part of our range of services."

Requirement

- You need to draw a wireframe diagram of your UI
- Use Android Studio to design the UI with appropriate colour scheme, etc
- Put the wireframe diagram and screenshot of the app on one A4 page, save as a PDF in Word and email PDF to r.oconnor@csn.ie
