Visual Basic Exercise

You are required to design a UI and Visual Basic application to calculate the volume of a cylinder $(V=\pi r^2 h)$

Input

- Height of cylinder
- Radius of cylinder

Process

- Calculate the volume of the cylinder using formula

Output

- Volume of cylinder

Testing

- Use the following test values
- Height = 25
- Radius = 5

Requirements

- Put a screenshot into a Word doc along with source code for your solution
- Save as a PDF and email to r.oconnor@csn.ie
